

Other guitars may sound this good.
But their prices don't.

The C Series is just what you'd expect from an expensive guitar, without the expense.

Hard rock maple, walnut, ash and mahogany. High-output Gotoh® and MightyMite® humbuckings with double coil, trapped split coil and phase switching circuitry. Gotoh precision T2-to-1 ratio turning machines. Solid brass nut and bridge pieces and heel-less necks that extend through the body to provide maximum sustain. A new variable pre-amplifier on our low priced CSE-7. And every C Series is finished in durable, high gloss polyurethane.

C Series®
by CONN

C Series by Conn. While our sound and features may be overpowering, the price isn't — \$199.95 to \$499.95.
